

Rethinking Human Well-Being: A holistic Flourishing perspective

Josue Aduna

University of Southampton, UK
Smart Social Software Studio, RO

Conceptual framework

- Well-being as multidimensional flourishing: the synthesis of *feelings* and *functionings*
- Aristotelian foundation: eudaimonia. But how is it operationalised and what does it entail?
- PERMA model of flourishing
- Beyond a self-centred conception of well-being: the moral component.

Table 4: Summary of well-being dimensions obtained

	Dimension	Features	Cronbach's α
Component 1	Hedonic	Happiness Satisfaction	0.81
Component 2	Eudaimonic	Accomplishment Engagement Meaning Relationships	0.62
Component 3	Moral	Ecology Empathy Equity	0.58

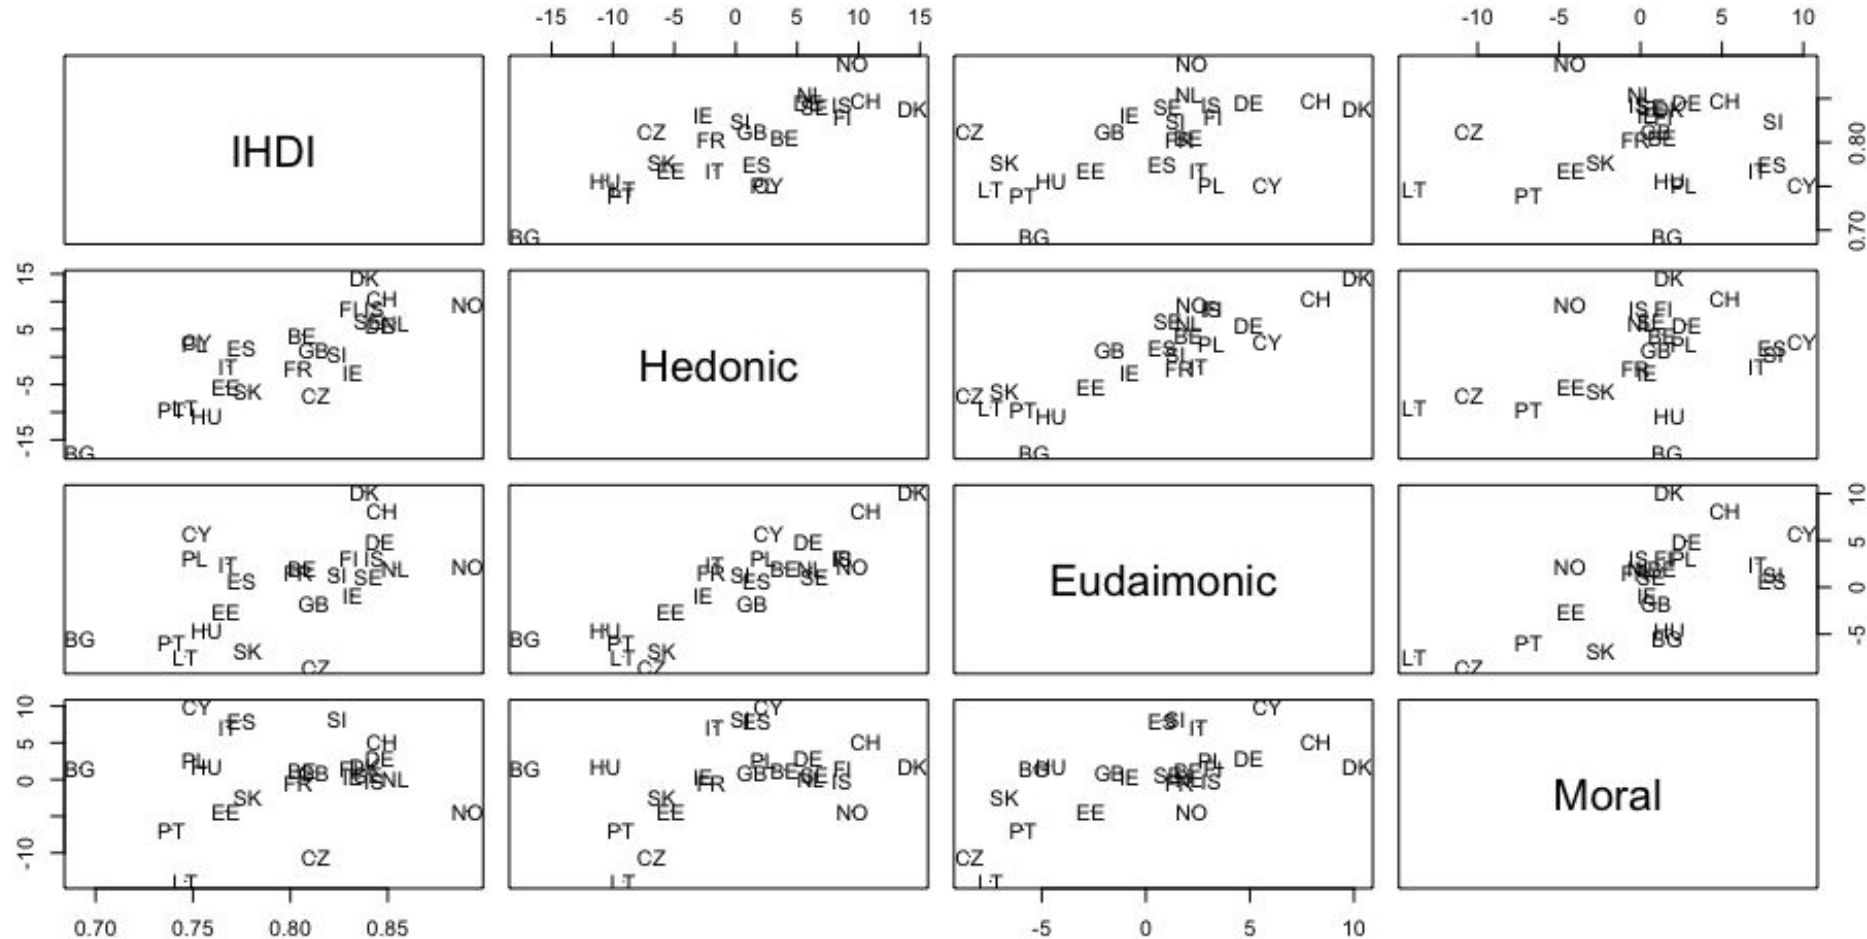

Table 3: Rotated component matrix

Feature	Rotated Components		
	1 (20%)	2 (20%)	3 (18%)
Happiness	.88	.19	.04
Satisfaction	.89	.11	-.04
Accomplishment	.18	.75	-.02
Engagement	.21	.56	.21
Meaning	.00	.79	.11
Relationships	.41	.43	.18
Ecology	-.02	.12	.71
Empathy	.09	.16	.71
Equity	.01	.01	.75

Table 7: Partial correlation matrix among well-being indicators

	IHDI	Hedonic	Eudaimonic	Moral
IHDI	-			
Hedonic	.74	-		
Eudaimonic	-.37	.82	-	
Moral	-.06	-.30	.64	-

Results

Discussion

- The insufficiency of current well-being indicators to explain human flourishing should be a matter of public concern
- Morality relates personal well-being with broader issues of the collective wellness of humanity and the environment
- If a truly eudaimonic account of human well-being is intended, it is vital to embrace morality as a relevant, if not central, element of well-being
- The eudaimonic dimension provides a promising pathway to enhance the human condition, both individually and at a societal level
